

# Presentation Software, a side-by-side view

	Visionary's ReViewer	TrialPro	TrialDirector	Sanction
General interface	Good	Good, but must run two programs to edit and prepare	Good, simple database structure but not flexible	Good, Windows Explorer type tree and list view
Creating new case	Easy	Easy	Easy	Easy
Loading of images	Single, multiple and batch file through load utility	Single, multiple and batch file	Single, multiple and batch file through load utility	Single, multiple and batch file; drag-and-drop from Windows Explorer
Single image load	Yes	Yes	Yes	Yes
Formats supported importing from other applications	Concordance/Opticon and specific comma delimited ASCII files	Concordance/Opticon, Summation and any comma delimited ASCII files	Summation and all other major formats, but no non-standard formats	All major formats and all ASCII delimited files
Links with third-party applications	Strong integration with Concordance, and links to all DDE compliant applications	Strong link with LiveNote and links to all DDE compliant applications	Strong integration with Summation and links to all DDE compliant applications	Links to all DDE compliant applications
Exporting to other applications	Does not export index load files but can export transcripts.	Does not export index load files but can export transcripts.	Exports ASCII transcripts, TrialDirector database files.	Exports various load files - .oll, .dli, .log, .lfp, .dbf, .mpi, .sdt and any other custom ASCII files
Document organization	Must use IssueBuilder; software does not initially recognize breaks between each document or exhibit	No document organizer, software does not initially recognize breaks between each document or exhibit	Folder structure allows drag-and-drop functionality from browse list of any exhibit in any media type in case	Windows Explorer structure allows easy drag-and-drop functionality from tree and list view of any exhibit; custom specialty folders
Data entry	Good data entry	Good data entry	Good data entry	Good data entry
Automatic exhibit incrementing	Can do global re-name but not re-numbering	Can do global re-name but not re-numbering	Can do global re-name using find and replace in any field in database; can re-number/re--sequence automatically through subset case creation	Powerful case editor with search and replace on any field; global re-naming and re-number/re--sequence feature in case editor, and right click menu re-name/re-number functionality
Folder structures	N/A	N/A	Folders used to organize subsets of exhibits, presentation scripting and exhibit outline creation	Extensive use of folder structure based on Windows Explorer interface, including user definable folders
Thumbnail searching	N/A	N/A	Thumbnail browse by scrolling over browse list	N/A
Scripting	Excellent tool in the Issue Builder	Has some scripting, but is difficult to use	Scripting from folders with ability to re-order by drag and drop; fully editable script text file; timing sequence capabilities	N/A
Memo	Good memo and note utility in the IssueBuilder	Can add some notes in Database view description	Memo capabilities for each page of exhibits, auto import from other database programs, contents automatically appear in exhibit outline	Can add notes to any item contained within the database and import notes from other applications through field importer utility
Integration with third-party applications	Integrates with Summation, Concordance, DBText works via DDE and clipboard	N/A	Integrates with Summation, Concordance, DBText Works and fully DDE and clipboard compliant	Links to all DDE compliant applications
Document image annotation tool	Excellent capability with full-featured annotator	Excellent capability with full-featured annotator	Excellent capability with full-featured annotator; editable toolbar	Excellent capability with full-featured annotator; right click functionality
Specific tools	Screen adjust for multiple exhibit display	N/A	N/A	N/A
Stamping	Yes	Yes	Yes	Yes
Floating tool box	Yes	Yes	Yes	Yes
Right click functionality	Some	Some	Some	complete functionality

Layered presentation	Yes, in the Issue Builder	Must build in the database view	In browse, folder and presentation mode	Yes, in view and presentation mode
Trial presentation mode	Good interface with good functionality; presentation exhibit drop-down box	Good interface with good functionality	Good interface with good functionality; with presentation palette in Dual Monitor mode excellent launch, zoning and annotation features	Good interface with good functionality; presentation exhibit drop-down box
Dual screen capabilities	Yes	Yes	Yes	Yes
Launching documents	From either the IssueBuilder or in "CourtViewer" mode	Only in Trial Presentation Mode	From browse list by clicking on icon, from script files by keyboarding script name, in presentation mode by barcode, keyboarding ID, Exhibit No. or Trial Exhibit No., or drag-and-drop to presentation palette in Dual Monitor mode	Launch from viewer mode by clicking on item in list view, in presentation mode blind typing of ID, presentation exhibit drop-down box, barcode
Digital video import	Yes, easy import	Yes, easy import	Dual Monitor mode	Yes, easy import
Ability to create video clips	Excellent and very simple	Excellent and very simple	Yes, easy to import	Excellent and very simple
Ability to edit video clips	Easy yet you must save edited clip as a new clip	Easy and very simple to use	Easy. very simple to use, automatically creates subclips for optional selection	Easy and very simple to use, automatically displays segment clips in list view with drag-and-drop manipulation
Ability to create video deposition clip	Easy by click and drag. No multiple clip import	Easy by click-and-drag. No multiple clip import	Using DepositionDirector to create clips, select page and line numbers, highlight transcript text and create clip with right-click or drop-down command, and create multiple clips across multiple transcripts from page and line batch file	Using media clip creator can create clips by page and line ranges references, multiple clips across multiple videos using ASCII file clip list, and highlight range of text from deposition transcript
Printing bar codes	IssueBuilder can print scripts with description and bar codes as well as a variety of different customizable formats for bar code reports	Multiple full-featured bar code printing module with thumbnails or description type reports	Full page with editable footer, thumbnails with barcodes, exhibit outliner with thumbnails, barcodes, or both; bar codes on labels	Full page with flexible barcode positioning, thumbnails with barcodes, Page ID description and notes field; bar codes on labels
Saving and organizing annotated clips in trial presentation mode	Saved items go right into a new Issue builder	Saved items go into the database list	Saves to database list on "camera" tab; grab screen or grab zone functionality	Saves to database list as new file subordinate to original, function key (F7) presentation mode screen capture
OLE and PDF compliant	Can run any other program including other trial presentation softwares from within the application.	N/A	Yes, within both browse and presentation mode	Manages pdf but not ole; alt-tab to PowerPoint seamlessly
Zooming	Rubber band with click-and-drag, magnify(pop-out) with multiples	Rubber band with click and drag, magnify(pop-out) with multiples, but cannot move tear out around document	Standard, rubber band with click and drag, multiple pop-outs and projection zooming on one exhibit	Rubber band with click and drag, magnify(pop-out) with multiples
Synchronized deposition video and text	Full-screen video with customizable screen layout and customizable scrolling text line length	Full-screen video, video and text or just text; customizable number of scrolling text line length	Closed caption text; full-text with or without scrolling highlight, video only, text only, video and text with synchronized exhibits	Full-screen video and video with single line text; simultaneous presentation of multiple video sources with or without synchronized text
Zone presentation	Total customizable up to 16 windows if necessary.	Side-by-side, top and bottom	Side-by-side, top and bottom, quadrant	Side by side, top and bottom
Video zone presentation	Total customizable up to 16 windows if necessary.	Side-by-side, top and bottom	Full-screen video, video and exhibit side-by-side, top and bottom or zone for video and multiple exhibits	Mouse selectable video with side by side or top and bottom presentation
Time stamping of video	No	No	No	Yes
video clip separate save	No	No	Yes	No
Installation	Easy to install; single user license available	Easy to install; single user license available	single user and separate network license; mandatory maintenance agreement; purchase price based on combination of modules selected	licensed per seat, fully networkable, volume discount on multi-user installations, no additional modules or product required
Support	Must purchase separate maintenance plan	Must purchase separate maintenance plan	Unlimited support with purchase of maintenance agreement, training at InData for fee	Free training in Phoenix, unlimited free support included, no maintenance agreement
Cost	\$895	\$795	\$1,295	\$395
